1. CLOSE tap.
(Leave hose attached)

2. CLOSE Check valve.
(If cleaning a real ale)

3. Switch OFF machine.

4. Connect coupler to product.

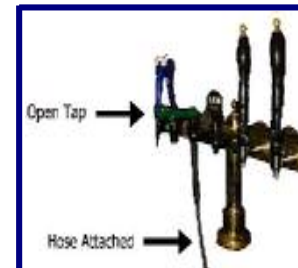

5. Switch ON the gas to the product.

6. Switch ON any pump assist (If fitted).

7. FILL FoB with product (If fitted).

8. Put FoB back in NORMAL mode.

9. Draw product to bar (open & Close Tap).

10. Remove the waste hose.

11. Replace restricted nozzles (e.g. Guinness).

12. Test a small amount of product.

REMEMBER !

There is a trouble-shooting guide on the Phoenix website, just click on Help Desk

If you change detergent type, please let us know. It may need resetting

Water, power and detergent supplies must be correct before starting a clean cycle.
